Outlook for the 12 Months Ending December 31, 2019

The Company is reiterating its guidance for 2019 FFO per share on a fully diluted basis in a range of \$1.16 - \$1.20.

	Low	High
Net income (loss) per share – fully diluted basis	\$ 0.06	0.10
Plus: real estate depreciation and amortization	\$ 1.10	1.10
FFO per share – fully diluted basis	\$ 1.16	1.20

This guidance assumes \$200 million of acquisitions, not including the Q1 2019 closings of the final three properties in the 14-property portfolio, and \$75 - \$100 million of gross development-related investment during 2019. Additionally, this guidance includes two factors which, in combination, diminish the Company's expected results, relative to the Company's 2018 performance, by approximately \$0.045 per share on a fully diluted basis. First, positive non-cash adjustments to rental income from the amortization of above and below market leases, are expected to decline by approximately \$2.5 million in 2019. Second, the Company's weighted average shares on a fully diluted basis in 2019 will include approximately 1 million units that are the result of long-term incentive plan grants that were made at the time of IPO. Pro forma for these two factors, the midpoint of the Company's 2019 guidance represents year-over-year FFO per share on a fully diluted basis growth of approximately 4.5%.

The Company's guidance for 2019 FFO per share on a fully diluted basis represents expected FFO, as Adjusted per share on a fully diluted basis growth of approximately 6% to 11%. This is due, in part, to an anticipated year-over-year change in straight-line rent and above and below market lease amortization adjustments of approximately \$4.5 million.

This guidance is forward-looking and reflects management's view of current and future market conditions. The Company's actual results may differ materially from this guidance.

Non-GAAP Supplemental Financial Measures

This section contains definitions of certain non-GAAP financial measures and other terms that the Company uses in this press release and, where applicable, the reasons why management believes these non-GAAP financial measures provide useful information to investors about the Company's financial condition and results of operations and the other purposes for which management uses the measures. These measures should not be considered in isolation or as a substitute for measures of performance in accordance with GAAP. Additional detail can be found in the Company's most recent annual report on Form 10-K and quarterly report on Form 10-Q, as well as other documents filed with or furnished to the SEC from time to time.

Cash Available for Distribution (CAD) is a non-GAAP financial measure that is not intended to represent cash flow for the period and is not indicative of cash flow provided by operating activities as determined under GAAP. CAD is calculated in accordance with the current NAREIT definition as FFO minus normalized recurring real estate-related expenditures and other non-cash items and nonrecurring expenditures. CAD is presented solely as a supplemental disclosure because the Company believes it provides useful information regarding the Company's ability to fund its dividends. Because all companies do not calculate CAD the same way, the presentation of CAD may not be comparable to similarly titled measures of other companies.

EBITDA is calculated as the sum of net income (loss) before interest expense, income taxes, depreciation and amortization. EBITDA is not intended to represent cash flow for the period, is not presented as an alternative to operating income as an indicator of operating performance, should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP and is not indicative of operating income or cash provided by operating activities as determined under GAAP. EBITDA is presented solely as a supplemental disclosure with respect to liquidity because the Company believes it provides useful information regarding the Company's ability to service or incur debt. Because all companies do not calculate EBITDA the same way, the presentation of EBITDA may not be comparable to similarly titled measures of other companies.

Funds From Operations (FFO) is defined by NAREIT as net income (loss), calculated in accordance with GAAP, excluding gains or losses from sales of property and impairment losses on depreciable real estate, plus real estate depreciation and amortization, and after adjustments for unconsolidated partnerships and joint ventures. FFO is a widely recognized measure of REIT performance. Although FFO is a non-GAAP financial measure, the Company believes that information regarding FFO is helpful to shareholders and potential investors.

Funds From Operations, as Adjusted (FFO, as Adjusted) adjusts FFO to present an alternative measure of our operating performance, which, when applicable, excludes the impact of acquisition costs, straight-line rent, above-/below-market leases, non-cash interest expense, non-cash compensation and other non-cash items. By excluding these income and expense items from FFO, as Adjusted, the Company believes it provides useful information as these items have no cash impact. In addition, by excluding acquisition related costs the Company believes FFO, as Adjusted provides useful information that is comparable across periods and more accurately reflects the operating performance of the Company's properties.

Other Definitions

Fully diluted basis assumes the exchange of all outstanding common units representing limited partnership

interests in the Company's operating partnership, or common units, the full vesting of all shares of restricted stock units, and the exchange of all earned and vested LTIP units in the Company's operating partnership for shares of common stock on a one-for-one basis, which is not the same as the meaning of "fully diluted" under GAAP.
