Non-GAAP Supplemental Financial Measures

This section contains definitions of certain non-GAAP financial measures and other terms that the Company uses in this press release and, where applicable, the reasons why management believes these non-GAAP financial measures provide useful information to investors about the Company's financial condition and results of operations and the other purposes for which management uses the measures. These measures should not

be considered in isolation or as a substitute for measures of performance in accordance with GAAP. A reconciliation of the differences between each non-GAAP financial measure and the comparable GAAP financial measure are included in this press release following the consolidated financial statements. Additional detail can be found in the Company's most recent annual report on Form 10-K and quarterly report on Form 10-Q, as well as other documents filed with or furnished to the Securities and Exchange Commission from time to time. We present certain financial information and metrics "at Easterly's Share," which is calculated on an entity-by-entity basis. "At Easterly's Share" information, which we also refer to as being "at share," "pro rata," or "our share" is not, and is not intended to be, a presentation in accordance with GAAP.

Cash Available for Distribution (CAD) is a non-GAAP financial measure that is not intended to represent cash flow for the period and is not indicative of cash flow provided by operating activities as determined under GAAP. CAD is calculated in accordance with the current Nareit definition as FFO minus normalized recurring real estate-related expenditures and other non-cash items, nonrecurring expenditures and the unconsolidated real estate venture's allocated share of these adjustments. CAD is presented solely as a supplemental disclosure because the Company believes it provides useful information regarding the Company's ability to fund its dividends. Because all companies do not calculate CAD the same way, the presentation of CAD may not be comparable to similarly titled measures of other companies.

Core Funds from Operations (Core FFO) adjusts FFO to present an alternative measure of the Company's operating performance, which, when applicable, excludes items which it believes are not representative of ongoing operating results, such as liability management related costs (including losses on extinguishment of debt and modification costs), catastrophic event charges, depreciation of non-real estate assets, provision for (recovery of) credit losses, and the unconsolidated real estate venture's allocated share of these adjustments. In future periods, the Company may also exclude other items from Core FFO that it believes may help investors compare its results. The Company believes Core FFO more accurately reflects the ongoing operational and financial performance of the Company's core business.

EBITDA is calculated as the sum of net income (loss) before interest expense, taxes, depreciation and amortization, (gain) loss on the sale of operating properties, impairment loss, and the unconsolidated real estate venture's allocated share of these adjustments. EBITDA is not intended to represent cash flow for the period, is not presented as an alternative to operating income as an indicator of operating performance, should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP, is not indicative of operating income or cash provided by operating activities as determined under GAAP and may be presented on a pro forma basis. EBITDA is presented solely as a supplemental disclosure with respect to liquidity because the Company believes it provides useful information regarding the Company's ability to service or incur debt. Because all companies do not calculate EBITDA the same way, the presentation of EBITDA may not be comparable to similarly titled measures of other companies.

Funds From Operations (FFO) is defined, in accordance with the Nareit FFO White Paper - 2018 Restatement, as net income (loss), calculated in accordance with GAAP, excluding depreciation and amortization related to real estate, gains and losses from the sale of certain real estate assets, gains and losses from change in control and impairment write-downs of certain real estate assets and investments in entities when the impairment is directly attributable to decreases in the value of depreciable real estate held by the entity. FFO includes the Company's share of FFO generated by unconsolidated affiliates. FFO is a widely recognized measure of REIT performance. Although FFO is a non-GAAP financial measure, the Company believes that information regarding FFO is helpful to shareholders and potential investors.

Net Debt and Adjusted Net Debt Net Debt represents the Company's consolidated debt and its share of unconsolidated debt adjusted to exclude its share of unamortized premiums and discounts and deferred financing fees, less its share of cash and cash equivalents and property acquisition closing escrow, net of deposit. By excluding these items, the result provides an estimate of the contractual amount of borrowed

capital to be repaid, net of cash available to repay it. The Company believes this calculation constitutes a beneficial supplemental non-GAAP financial disclosure to investors in understanding its financial condition. Adjusted Net Debt is Net Debt reduced by 1) for each project under construction or in design, the lesser of i) outstanding lump-sum reimbursement amounts and ii) the cost to date, 2) 40% times the amount by which the cost to date exceeds total lump-sum reimbursement amounts for each project under construction or in design and 3) outstanding lump-sum reimbursement amounts for projects previously completed. These adjustments are made to 1) remove the estimated portion of each project under construction, in design or previously completed that has been financed with debt which may be repaid with outstanding cost reimbursement payments from the US Government and 2) remove the estimated portion of each project under construction or in design, in excess of total lump-sum reimbursements, that has been financed with debt but has not yet produced earnings. See page 28 of the Company's Q1 2026 Supplemental Information Package for further information. The Company's method of calculating Net Debt and Adjusted Net Debt may be different from methods used by other REITs and may be presented on a pro forma basis. Accordingly, the Company's method may not be comparable to such other REITs.

Other Definitions

Fully diluted basis assumes the exchange of all outstanding common units representing limited partnership interests in the Company's operating partnership, or common units, the full vesting of all shares of restricted stock, and the exchange of all earned and vested LTIP units in the Company's operating partnership for shares of common stock on a one-for-one basis, which is not the same as the meaning of "fully diluted" under GAAP.
